1. The radio equipment of a rifle regiment is of the R.B.M. type, built to work on both short and medium waves. The power is 70 - 140 watts, and the transmitter has a range of 100 kilometers. The tubes are of the KL-2 type. Power is supplied either by battery or by means of a hand-driven generator.
2. The equipment is utilized for communications with divisions and battalions, and is operated in the net because each regiment has only one radio.
3. The equipment is mobile and is operated by 15 soldiers, one sergeant who is a specialist in radiotelegraphy, and one specialist radio mechanic.
